ARTERY CLAMPS

An Overview On

Atraumatic Jaws

Also known as non-traumatic, atraumatic jaws will be mainly found in delicate surgery areas such as vascular and cardiothoracic. The design is such, that the surface area gripped is reduced, ensuring less trauma without the loss of grip.

Atraumatic jaws are available as straight or curved.

Special Care Needed For Your Thoracic Instruments

Staining

Beware of the use of Saline during surgery. This can be very damaging to any instrument if not immediately rinsed after surgery. Saline is highly corrosive. The image shows damage to the passive surface of an instrument.

Rusting

Due to the nature of their use, Thoracic Retractors can tarnish or present rust easily. These retractors can be fully refurbished and passivated by Shark Instruments.
