STEL TEC LAPAROSCOPIC

STAHLÉAN BRAZIL
SAVING LIVES

Reusable 32 and 45 cm length laparoscopic instruments

• 32 and 45 cm lengths accommodate standard and advanced laparoscopic procedures, including Gynecology & Bariatrics.
•Rotating shafts with 360 degree rotation, one finger controls the tip placement.
• A wide variety of handle styles are available to accommodate a wide variety of surgeon preference.
• Extensive selection of tip styles.
•Offered in two styles to meet your cleaning requirements.
•Modular Laparoscopic instruments can be quickly disassembled for cleaning and visual inspection. Processing technicians
spend less time removing bio-burden and the risk of HAI decreases when they can be certain that bio-burden is not
trapped in the instrument. Easily reassembled for the surgeon prior to use in surgery

Single Piece with Flush-Port for quick flushing of bio-burden

Features:
• Durablity and Longevity - Stainless steel construction, medical grade polymer coating guarantee long
live, easy maintenance and safety.
• Precise & Ergonomic Handling - Jaw patterns are designed and machined for precision grasping,
dissecting or cutting. Large-finger handles with tang and large diameter rotating drum with stainless
steel roller bearings give you precise control and comfort while reducing hand fatigue.
• Optimal Cleaning & Maintenance - Flush ports and expanded push-rod clearance on non-modular
instruments, minimum components and solid connections on modular instruments assures easy
maintenance.
• Excellent Return on Investment - Completely reusable and fully-autoclavable.

CETTA Disposable - Black

The outstanding quality of the CETTA disposable product range is immediately apparent; high grade medical stainless steel, reassuring weight, excellent balance and superb finish. We strongly believe CETTA is not only the best disposable product available worldwide, but is also far superior to the majority of re-usable cannula available.

Cetta handle: POM

CETTA Cannula - identified by black handles.

Certain styles of handles are made using POM - Polyoxymethylene (An exceptional and recyclable engineering thermoplastic).

Cetta Toomey - hub Aluminium, shaft stainless steel

Cetta handle POM, shaft stainless steel

Cetta luer lock hub and shaft stainless steel

PRIMO Autoclavable - Gold

Our re-usable Primo range is as versatile as you need it to be, we will create any bespoke style and size upon request at standard list prices. The range shown in this catalogue is a guide to the most popular sizes and styles we currently provide. Many are regular stock items facilitating fast delivery. Made of durable high quality medical grade stainless steel with reassuringly weighty and balanced Aluminium handles available.

Primo handle: Aluminium

Primo Toomey - hub Aluminium, shaft stainless steel

Primo handle Aluminium, shaft stainless steel

Primo luer lock hub and shaft stainless steel

Feeling Creative?

We often work with surgeons to create their ideal size and tip design of cannula for a given purpose.

We can create bespoke CETTA and Primo from a basic drawing and description

Ask about our bespoke design service today

LIPOSUCTION & SUCTION TUBE

Infusion Needles

High grade stainless steel. 6 spaced holes in a spiral around the tip.

For fluid infusion using luer lock syringes, handles or giving set tubing.

Cetta - Disposable one piece cannulae

High grade stainless steel shaft, for aspiration with powered suction.

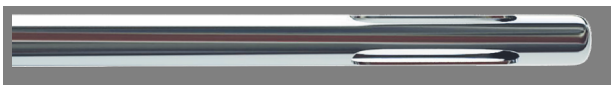

Cetta Handle: POM

Mercedes

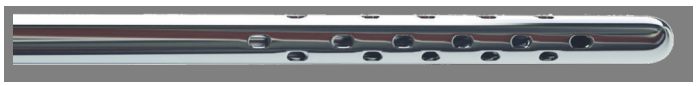

Three holes spaced evenly around the tip.

The most popular tip style world-wide.

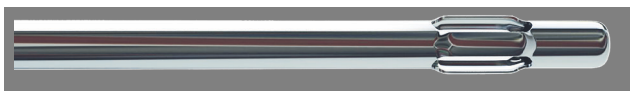

30 Hole Harvest Cannula

Harvest fat for transfer in smaller parcels for easier re-injection, reduces blocking.

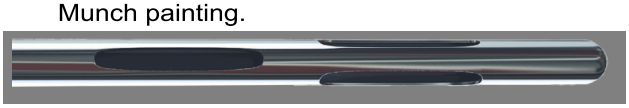

Lantern

Chinese lantern shaped tip, useful for fibrous areas and popular in Gynecomastia procedures.

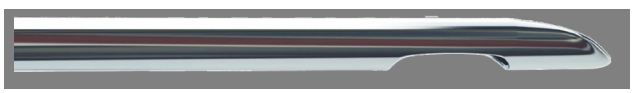

The Scream

Two holes above a single hole all downward facing. A cannula lookalike of the famous Munch painting.

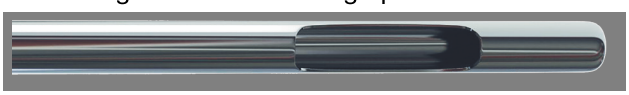

Submental

One hole, flat, spoon backed for areas closer to the skin; such as chins, knees and ankles.

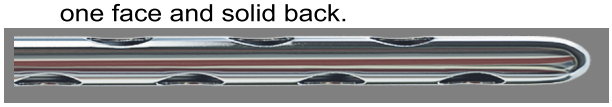

One Hole

A single downward facing aperture.

King Frank

Created by Dr Frank Niessen as a Multi-functional and multi useable cannula, holes on one face and solid back.

Mercedes Tip

Three holes spaced evenly around the tip.

The most popular tip style world-wide.

Open Harvest

Guarded fully open tip, designed specifically for tissue harvest.

Submental

One hole, flat, spoon backed for areas closer to the skin; such as chins, knees and ankles.

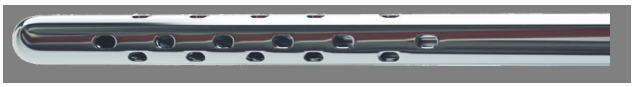

King Frank

Created by Dr Frank Niessen as a Multi-functional and multi useable cannula, holes on one face and solid back.

20/30 Hole Harvest Cannula

Harvest fat for transfer in smaller parcels for easier re-injection, reduces blocking.

Fat Transfer

Re-Injection Cannula

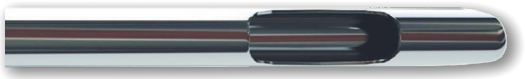

High grade Stainless Steel for re-injection using Luer lock syringes

Curved obtuse tip for accurate placement of micro droplets

Product Code	Product Code	Diameter (mm)	Length (cm)
CETTA 1285MD	PRIMO 1285MD	1.2	8.5

Micro/Nano Filters

Want to reduce fat molecule size or filter fat for re-injection?

1

Luer Lock to Luer Lock Transfers - Standard Hole

Simply use as a standard transfer adaptor tool between luer lock syringes.

Or for finer anaerobic re-injectable tissue start the process by working the graft through the adaptor from syringe to syringe around 20 times.

Product Code	Product Code
CETTA MIC/LL/LL	PRIMO MIC/LL/LL

Finer graft required, then:

2

Luer Lock to Luer Lock Micro Adaptors

Decrease fat size further in stages using these specially drilled multi-holed adaptors for a graft consistency more easily injectable via fine facial needles.

Primo only

Product Code
PRIMO MFC/LL

Then finer still:

3

Nano Fat Mesh Filter

This is designed to be used for very fine injectable grafts.

Re-usable outer case with sterile CETTA disposable mesh sets.

Product Code	
PRIMO NFC/LL	Adaptor
CETTA NFDF	Mesh x 5 per pack

- **Reliable...**
  for patients and hospital staff. The Stellate SterilContainer System helps ensure proper storage, transportation and sterilization of surgical instruments.
- **Cost-effective reusable container system...**
  low operating expense and typical 10+ year service life.
- **Easy to handle...**
  simple, fast and efficient – lightweight aluminum and ergonomic handles.
- **Clear identification match...**
  using colored lids, indicator labels, identification labels and barcoding - clearly identifiable and standardized, easy to track and document.

In addition to a full line of containers, Stellate also offers storage systems, instrument racks and convenient disposable products to support all of your sterilization needs.

The Stellate **I**nstrument **O**rganization **S**ystem is an advanced system of organizing, storing and protecting your instrument set during transportation and sterilization.

- Instruments organized with the **I**nstrument **O**rganization **S**ystem are guarded against damage from instrument-on-instrument impact during transportation
- Instrument protection reduces the cost of repairs ^ set downtime
- Instrument protection increases instrument life ^ reduces replacement cost

In the O.R. a set organized with the Stellate **I**nstrument **O**rganization **S**ystem can also help cases flow more efficiently by allowing staff to:

- Quickly identify and select the correct instruments
- Work directly from the organized set
- Replace used instruments into the correct slot making final instrument count easier

During sterilization, the Stellate **I**nstrument **O**rganization **S**ystem allows:

- Better sterilant flow between instruments
- Consistent sterilization every time because your instruments are in the same place

STEL TEC ENDOSCOPES

Stellate HD endoscopes are comprised of the highest quality materials and are designed and manufactured using the latest in optics technology. Our laparoscopes provide optimal performance for the surgeon and staff.

- Excellent imaging - high definition optics for clear, bright and sharp pictures
- Large selection of diameters and angles of view
- Adaptable to a variety of manufacturers' light cables and light sources
- Industry standard eyepiece is compatible to all camera systems

Instructions for quick and easy assembly and disassembly
For use with ST 750 and ST 851 insulated metal handles

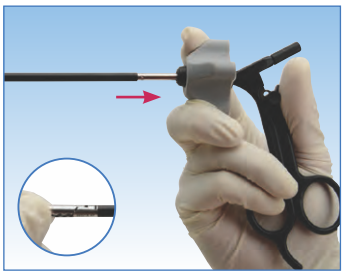

Assembly

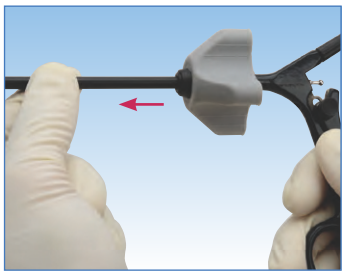

STEP 1
Slide the inner metal tube onto the jaw insert with its four spring tongues towards the working end until the tongues snap into place.

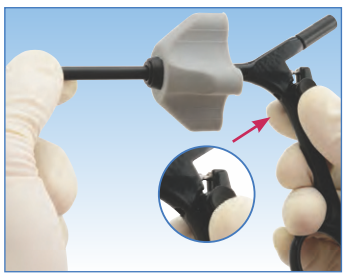

STEP 2
Slide the outer insulation tube as far as it will go over the inner metal tube.

STEP 3
Hold the shaft firmly by its tip and pull back the handle rotation knob with fingers and maintain hold. Fully insert the shaft and release the rotation knob.

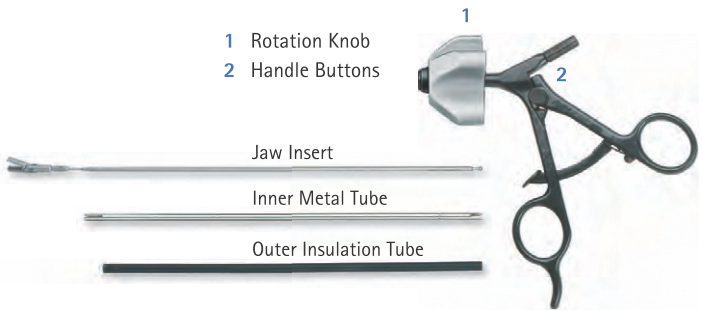

STEP 4
Test that the instrument is secured in the handle by pulling on the shaft. If the shaft pulls out of the handle, then repeat step 3 and step 4.

STEP 5
Connect the handle with the jaw insert ball joint, by depressing the black handle buttons on both sides of the handle. Continue to depress and lift the rear ring of the handle under the ball joint of the jaw insert until captured by the handle. Release the buttons.

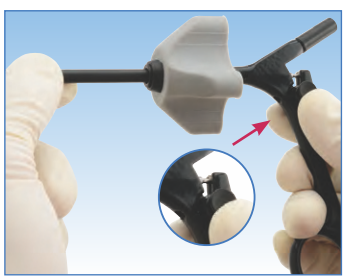

STEP 6
Test the assembly of the instrument by opening and closing the handle to ensure the jaw is opening and closing with handle movement.

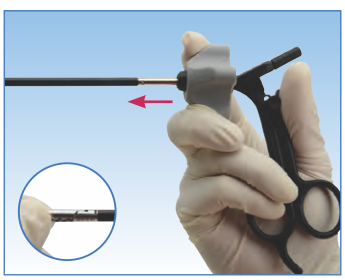

Maintenance:

- This product can be sterilized in a disassembled or assembled condition
- For advice on cleaning, disinfection and sterilization, please follow the instructions for use found at www.stellatesurgical.com

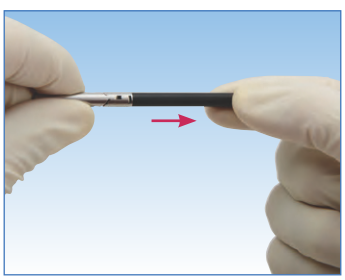

Disassembly

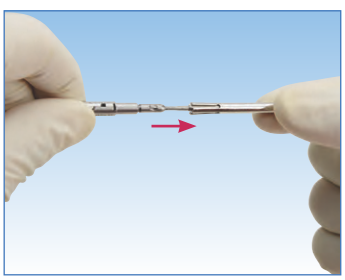

STEP 1
Depress the black handle buttons on both sides of handle, continue to depress, pull rear ring down to release ball of jaw insert. Release the buttons.

STEP 2
Pull back the rotation knob and pull out the shaft with other hand. Release the rotation knob.

STEP 3
Hold the jaw insert at the tip and remove the outer insulation tube.

STEP 4
Hold the jaw insert at the tip and remove the inner metal tube.
